# Welcome to your retirement

## (Saskatchewan members)

You and your employer have been contributing to the Co-operative Superannuation Society (CSS) Pension Plan for your retirement. Over the years these contributions have grown, and now that you're ready to retire you have to decide how to use your accumulated pension funds for a retirement income that best suits you! You're in the driver's seat. To make an informed decision, take the time to read this booklet and understand your options.

## 1. Preparing to choose

### What is the difference between locked-in and non-locked-in funds?

Your CSS pension account contains either locked-in funds or non-locked-in funds, or both. Please refer to your most recent annual statement or log in to myCSSPEN to determine your position. For most retiring members, the bulk of the funds in their CSS pension account will be locked-in.

**Locked-in** funds are employee and employer contributions that are locked-in by pension legislation. Pension legislation states that locked-in funds must be used to provide a "lifetime" retirement income. Some of the options for your locked-in funds at retirement ensure that you (and your spouse) will receive a lifetime income, while others do not.

**Non-locked-in** funds are employee contributions that are not locked-in by pension legislation. All

employee additional voluntary contributions are non-locked-in.

### **What are the options for my locked-in funds?**

There are different types of retirement income options. For **Saskatchewan** members<sup>1</sup> they are as follows:

1. A monthly pension from the CSS Pension Plan. This option ensures a lifetime retirement income.
2. A Life Annuity, available from a life insurance company. This option also ensures a lifetime retirement income.
3. Variable Benefit (VB) payments from the CSS Pension Plan.
4. A Prescribed Registered Retirement Income Fund (pRRIF) from a financial institution of your choice.
5. A combination of the above options.

### **What are the options for my non-locked-in funds?**

1. Combine them with locked-in funds to set up a monthly pension from the CSS Pension Plan.
2. Combine them with locked-in funds to set up a Life Annuity from a life insurance company.
3. Combine them with locked-in funds to set up Variable Benefit (VB) payments from the CSS Pension Plan.
4. Transfer to a Registered Retirement Savings Plan (RRSP) from a financial institution of your choice.
5. Transfer to a Registered Retirement Income Fund (RRIF) from a financial institution of your choice.

---

<sup>1</sup> A Saskatchewan member is someone who is currently working or last worked for an Employer of the CSS Pension Plan in Saskatchewan, and whose pension funds are therefore subject to the Saskatchewan pension legislation.

6. A cash withdrawal, subject to income tax. The income tax withholding rates for cash withdrawals are:
  - 10% for amounts up to and including \$5,000;
  - 20% for \$5,000.01 up to and including \$15,000;and
  - 30% for amounts over \$15,000.
7. A combination of the above options.

### **When must I decide?**

Canada Revenue Agency (CRA) requires that you convert your funds in the CSS Pension Plan into retirement income (as outlined above) no later than December of the year you turn Age 71. Until then, you can choose when to set up a retirement income with your funds in the Plan.

When you terminate employment, if you don't need retirement income right away, your pension funds can remain invested in one or more of the Plan's four investment Funds. You'll receive the rate of return generated by each Fund, just the same as other members of the Plan.

### **What is Phased Retirement?**

The *Income Tax Act* regulations now permit Phased Retirement, which means that you no longer have to terminate employment<sup>2</sup> to start receiving a retirement income from the CSS Pension Plan. In other words, you can now “semi-retire”.

---

<sup>2</sup> Termination of employment means you are no longer working for an Employer Member of the CSS Pension Plan.

There are some rules however. Whether you want to take a CSS pension (see page 5) or Variable Benefit (VB) payments (see page 10), you must be at least age 55. There is no limit on the amount of your pension funds that can be converted into a monthly pension or VB payments.

If you wish to apply for Phased Retirement, your employer must be in agreement, and your employer may require that you reduce your hours of work. You must also have your spouse's consent (if applicable). Also, as long as you are working for an employer member of the Plan, you and your employer must still contribute to the Plan, even though you are receiving a retirement income. Or, should you return to work for an employer member after starting retirement income, then you and your employer must make pension contributions again.

### **Must I decide all at once?**

If you wish to withdraw or transfer non-locked-in funds from the CSS Pension Plan, then all of your non-locked-in funds must be withdrawn and/or transferred at the same time.

In the case of locked-in funds, you may set up a CSS pension on a portion, or transfer out a portion to a Life Annuity or pRRIF and leave your remaining funds in the Plan. However, each subsequent transfer will be subject to an administration fee.

## 2. Retirement income options

### **What are the different CSS pension options?**

There are two basic types of pensions offered by the CSS Pension Plan: the Single Life Pension and the Joint & Last Survivor Pension.

Both of these types of pension provide a pension to you for as long as you live, that is, a lifetime pension. In the case of the Joint & Last Survivor Pension, upon your death, your surviving spouse will receive a pension for the rest of their lifetime as well.

When we refer to “spouse”, we mean spouse as defined by the pension legislation for the province/territory where you last worked for an Employer of the CSS Pension Plan (see page 32). This includes common-law relationships in certain circumstances.

### **What is a Single Life Pension?**

A Single Life Pension will provide a lifetime pension to you. After your death, if you have a surviving spouse, it does not provide a lifetime pension to them.

Single Life Pensions can have guarantee periods of 0 years (i.e., no guarantee), 10 years and 15 years. The longer the guarantee period, the lower your monthly pension.

A Single Life Pension, guaranteed 0 years (i.e., no guarantee), will provide a lifetime pension to you for as long as you live. Once you pass away, the pension stops. In other words, the pension dies with you.

A Single Life Pension guaranteed 10 years, or 15 years will provide a lifetime pension to you for as long as you live, and it is guaranteed to be paid for at least 10 or 15 years (depending upon your choice). If you pass away before the guarantee period expires, your pension will continue to be paid to your beneficiaries or estate for the balance of the guarantee period. If you outlive the guarantee period, there would be no payments to your beneficiaries or estate upon your death.

Assume, for example, that you select a Single Life pension with a 15-year guarantee period. You would receive your monthly pension for as long as you live. If you were to pass away 7 years after your pension starts, your monthly pension would continue to be paid to your beneficiaries or estate for 8 years, and then the pension would stop.

If a member with a spouse chooses a Single Life pension, they usually name their spouse as beneficiary.

**If you have a spouse, Saskatchewan pension legislation requires you to choose a Joint and Last Survivor Pension that provides at least a 60% lifetime survivor benefit to your surviving spouse, unless your spouse signs an applicable waiver form. Therefore, if you wish to choose a Single Life Pension and you have a spouse, they will need to complete an applicable waiver form.**

### **What is a Joint & Last Survivor Pension?**

A Joint & Last Survivor Pension will provide a lifetime pension to you, and after your death, your surviving

spouse will receive a lifetime pension as well. Joint pensions pay less than Single Life pensions, because they cover two lives, yours and your spouse's.

Joint & Last Survivor pensions can be guaranteed for 10 years or 15 years. If both you and your spouse die before your selected guarantee period expires, the pension will continue to be paid to your beneficiaries or estate for the balance of the guarantee period.

The longer the guarantee period, the lower the monthly pension.

Suppose, for example, that you select a 15-year guarantee period, and both you and your spouse pass away 6 years after your pension starts. In that case, the full monthly pension would continue to your beneficiaries or estate for 9 years, then the pension would stop.

With a Joint & Last Survivor Pension, there are also different Spousal Benefit percentages to choose from (i.e., the amount of the pension that your surviving spouse receives after the guarantee period is over). The Spousal Benefit percentages are 60%, 75% and 100%.

For example, assume that you and your spouse select a Joint & Last Survivor Pension, guaranteed 15 years, with a 75% Spousal Benefit level. You will receive the full amount of the pension for the rest of your life.

If you die before the 15-year guarantee period is over, your surviving spouse would receive the full pension for the balance of the 15-year guarantee period, and

then they would receive 75% of the pension for the rest of their life.

If you die after the 15-year guarantee period is over, your surviving spouse would immediately receive 75% of the pension for the rest of their lifetime.

Once the guarantee is over and both you and your spouse have passed away, the pension stops.

Note that, if you and your spouse select the 100% Spousal Benefit level, your spouse will receive 100% of the pension for the rest of their lifetime, regardless of when the guarantee period ends.

All of the Joint and Last Survivor Pensions meet the joint and last survivor pension requirements under Saskatchewan pension legislation of providing at least a 60% lifetime survivor benefit to the surviving spouse, so no waiver is required if you choose any of the Joint and Last Survivor Pensions.

### **If I decide to take a CSS monthly pension, which one should I take?**

Everyone's situation is different, so the CSS monthly pension you (and your spouse) choose should be based on your personal circumstances. Below are examples of certain basic situations and appropriate pension selections:

- ❑ Spouse requires lifetime coverage from the pension: Joint & Last Survivor Pension, guaranteed 10 or 15 years, with 60%, 75% or 100% Spousal Benefit level.
- ❑ Spouse requires lifetime coverage from the pension, and there are dependent children:

- Joint & Last Survivor Pension, guaranteed 10 or 15 years, with 75% or 100% Spousal Benefit level.
- No Spouse, but there are dependents: Single Life Pension with 10 or 15-year guarantee and dependents designated as beneficiaries.
  - No spouse or dependents: Single Life Pension with 0, 10 or 15-year guarantee.
  - Spouse does not require lifetime coverage from the pension: Single Life Pension with 10 or 15-year guarantee, and spouse designated as beneficiary.

**PLEASE NOTE:** Once you have applied for a CSS monthly pension, and the payments have started, you CANNOT change your pension or stop the payments. Please choose carefully!

### **What are some important points to keep in mind about CSS monthly pensions?**

- A CSS monthly pension provides a fixed amount of monthly income for the rest of your life, and also to your surviving spouse in the case of the Prescribed Pension or a Joint & Last Survivor Pension. Your income will not vary as interest rates and investment returns fluctuate.
- However, for this certainty of income, you give up flexibility and control of your pension funds.
- A CSS monthly pension is not indexed for inflation.
- Your beneficiaries/estate will not receive any survivor benefits if you (or your spouse in the case of a Joint and Last Survivor pension) outlive the guarantee period.

- A CSS monthly pension is worry-free and requires no further action or decisions on your part.

### **What is a Life Annuity?**

Life Annuities are very similar to the monthly pension options available from the CSS Pension Plan. A Life Annuity provides a fixed monthly payment to you for as long as you live. In the case of a joint life annuity, upon your death, a fixed monthly payment is also provided to your spouse.

Life Annuities are available from life insurance companies. If you decide to use your pension funds for a Life Annuity, you must transfer your funds from the CSS Pension Plan to your chosen life insurance company.

Once you transfer your funds out of the CSS Pension Plan to a Life Annuity, you cannot transfer them back.

### **What are Variable Benefit Payments?**

Variable Benefit (VB) payments are quite different from a monthly pension. A pension guarantees you a fixed monthly income for life. VB payments are simply periodic withdrawals from your CSS account. VB payments give you flexibility in setting the amount of your withdrawals. However, with VB payments there is no guarantee that you will receive an income for life.

Beginning in the calendar year you turn 72 years old, there is an annual minimum amount that you must withdraw.

As a Saskatchewan member<sup>3</sup>, there is no annual maximum limit (other than your total account balance) on the amount that you can withdraw from your CSS account.

VB payments are taxable income<sup>4</sup>.

### **When can I start VB payments?**

You must have reached your early retirement age (please refer to your most recent Annual Statement) before starting VB payments. For most members, early retirement is age 50. Your spouse must sign a waiver and a consent form before you can set up VB payments.

### **Can VB payments be stopped?**

Yes. Once you start VB payments you can stop them if you are not yet 72 years old. Beginning the year in which you turn 72, there is a minimum amount that must be withdrawn each year.

### **What is the minimum annual requirement for VB payments?**

The minimum annual requirement is the amount you must withdraw each year in accordance with the *Income Tax Act*.

---

<sup>3</sup> A Saskatchewan member is someone who is currently working or last worked for an Employer of the CSS Pension Plan in Saskatchewan, and whose pension funds are therefore subject to the Saskatchewan pension legislation.

<sup>4</sup> At age 65, VB payments qualify for the pension income amount when calculating your non-refundable tax credits, and for the pension income splitting provision.

The minimum for VB payments is the same as the RRIF minimum (see chart on page 22). The minimum can be based on your age, or if you have a spouse (as defined under the *Income Tax Act*) it can be based on their age. However, until the year you reach age 72 the minimum annual VB payment is zero.

### **Is there a maximum annual limit for VB payments?**

Under Saskatchewan pension legislation, whether you are receiving VB payments from your locked-in funds or your non-locked-in funds, there is no maximum annual limit<sup>5</sup>.

Subject to the required minimum that applies once you turn 72, you can set your VB payments at any amount up to the total in your account. You can also take lump-sum withdrawals. You are entitled to one free lump-sum withdrawal per calendar year. Any subsequent lump-sum withdrawals within the same calendar year will be subject to a nominal cost recovery administration fee.

### **Can I receive VB payments monthly?**

You can set up your VB payments so that you receive income monthly or annually.

As indicated above, subject to the required minimum which starts the year you turn 72, your VB payment withdrawals can be as little or as much as you like.

For example, you can set up your VB payments to be \$500 or \$750 or \$1,000 monthly, or some other

---

<sup>5</sup> Most provincial pension legislation (except for Saskatchewan) imposes a maximum annual withdrawal for VB payments on locked-in funds.

amount that best suits your personal circumstances. **It is very important to remember that the higher your VB payments, the faster you will use up the funds in your CSS account, and greater the risk that your funds may not last for your lifetime (and your spouse's).**

Regardless of how much you set up your VB payments to be, you will be able to change the amount once per calendar year for free. Any subsequent changes within the same calendar year will be subject to a nominal cost recovery administration fee.

### **What happens to the VB payments when I die?**

Your surviving spouse is automatically entitled to receive your funds upon your death, unless your spouse waives this right. Your spouse can revoke this “waiver” anytime before your death.

If you name your spouse as the “specified beneficiary” they will continue with the VB payments, or may also transfer out any remaining funds if they prefer.

If you don't have a surviving spouse or if your spouse has signed the “waiver”, upon your death the balance of the VB payments are paid as a taxable lump-sum to your estate or named beneficiary(ies).

### **What are the investment options for VB payments?**

When you are receiving VB payments the investment options available to you are same as they are now. In other words, when you are receiving VB payments, the funds in your CSS account stay invested in the

Pension Plan's Balanced, Money Market, Bond and/or Equity Funds according to your investment instructions.

**The Balanced Fund is the Plan's default option. Therefore, unless you instruct, or have instructed the Plan otherwise, all of the funds are invested in the Balanced Fund.**

The Balanced Fund is a broadly diversified portfolio of about 55% stocks and 45% bonds, real estate, mortgages and emerging market debt. It is a moderate risk portfolio designed to produce moderate growth over the long-term, and is expected to have periodic short-term losses.

The Money Market Fund invests entirely in short-term money market instruments. It's therefore a low risk – low return investment option, and is unlikely to have a negative return.

The Bond Fund invests mainly in Canadian bonds (federal, provincial, municipal and corporate bonds). It's a modest risk – modest return portfolio over the long-term. The Bond Fund can suffer occasional short-term losses.

The Equity Fund invests entirely in Canadian and foreign stocks (about 1/4 Canadian and 3/4 non-Canadian). It's a high risk – high return portfolio over the long-term, and is expected to suffer fairly frequent short-term losses.

You can invest in any one fund or any combination of the four investment funds.

## **If I start VB payments should I consider changing how the funds in my CSS account are invested?**

When you are saving for retirement the investment strategy is to provide long-term growth. However, when you are retired, you may be more interested in capital preservation and a regular income with some protection from inflation.

In retirement you may feel comfortable keeping all of your funds invested in the Balanced Fund or some combination of the Bond Fund and Equity Fund. By investing a significant percentage of your funds in stocks/equities, you could expect to reduce the impact of inflation. However, stocks/equities are expected to have occasional short-term losses, which could affect your retirement income, or how long your funds will last.

On the other hand, investing all of your funds in the Money Market Fund, for example, will stabilize your expected return, but this strategy may be too conservative. Also, the expected return of the Money Market Fund would be too low to protect against inflation, and could affect how long your funds will last.

As a retiree receiving VB payments, you might consider investing some of your funds in the Balanced Fund or some combination of the Bond Fund and Equity Fund, along with investing some in the Money Market Fund. By investing some of your funds in stocks and bonds, you can expect to earn higher long-term average returns, and also reduce the impacts of inflation. And, by investing some of

your funds in the Money Market Fund you can expect to reduce your risk.

It is your responsibility to instruct<sup>6</sup> the Plan on the percentage of your funds that you want invested in each of the four investment Funds. These percentages will depend upon your risk and return comfort level, as well as any other investments, savings, or sources of income you might have.

Or for example, you might consider starting with three years' worth of VB payments invested in the Money Market Fund and the remainder of your funds invested in the Balanced Fund or some combination of the Bond Fund and Equity Fund. You would then withdraw your VB payments from the Money Market Fund. Then every so often (i.e., annually for example) you would replenish the amount withdrawn from the Money Market Fund with a transfer from the Balanced Fund, or Bond Fund and Equity Fund. However, if the bond and/or equity markets were down when it came time to replenish the Money Market Fund, you could wait until these markets recovered because you would still have two years worth of VB payments left in the Money Market Fund.

Allocating your funds between the Balanced Fund or some combination of the Bond Fund and Equity Fund, along with allocating some in the Money Market Fund is a matter of personal choice that will

---

<sup>6</sup> By submitting investment instructions online via your myCSSPEN account (or a properly completed Investment Instructions form to the CSS Pension Plan, along with the required processing fee) you can adjust the amount of your funds invested in each of the four Funds.

depend upon your overall financial and personal circumstances. As a result, the CSS Pension Plan suggests that you get advice from a qualified financial planner to assist with your decision.

If you want your funds to provide VB payments for your lifetime (and your spouse's), it is strongly recommended that you regularly review the investment performance of your funds as well as your VB payment amount. It may be necessary to reduce the amount of your VB payments if the investment performance is less than you expected.

### **What are some important points to keep in mind about VB payments?**

- ❑ VB payments may not provide lifetime income for you (or your spouse).
- ❑ VB payments offer flexibility. Other than withdrawing the required minimum payment, you may choose your payment plan. You can also make lump-sum withdrawals.
- ❑ You must instruct the Plan on the investment of your funds between the four investment Funds.
- ❑ If your rate of return is higher than expected, your payments may be higher or last longer than anticipated. However, the opposite holds true if your rate of return is lower than expected.
- ❑ Once you pass away, any remaining funds will roll over to your spouse, or be paid as a taxable lump-sum to your estate or named beneficiary(ies).

- ❑ You can convert some or all of your funds into a CSS pension, a Life Annuity, or transfer them out of the Plan.
- ❑ If your retirement plan requires that your VB payments provide for a certain level of income for a certain length of time or last for your lifetime (and your spouse's), **you must monitor your rate of return and control your withdrawals.**

### **What is a Prescribed Registered Retirement Income Fund?**

A Prescribed Registered Retirement Income Fund (pRRIF) is very similar to VB payments for your locked-in funds, except pRRIFs are available from financial institutions, while VB payments are from the CSS Pension Plan.

Withdrawals from a pRRIF are taxable as income<sup>7</sup>. pRRIFs are only available to members whose pension funds are governed by Saskatchewan pension legislation.

### **Does my spouse have to sign a consent form before I can transfer my locked-in funds into a pRRIF?**

Yes, your spouse must sign a consent form before locked-in funds can be transferred into a pRRIF.

---

<sup>7</sup> Starting at age 65, pRRIF withdrawals qualify for the pension income amount when calculating your non-refundable tax credits, and for the pension income splitting provision.

### **Is there a minimum annual withdrawal for the pRRIF?**

Yes, the minimum annual withdrawal for the pRRIF is the same as for the RRIF (see chart on page 22). You don't have to withdraw money in the calendar year in which you open the pRRIF, but after that you must withdraw at least the minimum, which can be based on your age or your spouse's age.

### **Is there a maximum annual withdrawal limit for the pRRIF?**

No, just like VB payments there is no maximum withdrawal limit. You can also make cash lump-sum withdrawals from a pRRIF, subject to any investment restrictions imposed by the issuing financial institution.

### **How much income will I receive from my pRRIF each year?**

As long as you take out at least the required minimum each year, you can set up your pRRIF to pay you whatever amount you want. However, just like VB payments, once your money in the pRRIF is used up, that's it!

### **Can the payments from a pRRIF be stopped?**

Yes, until you are age 71 and after you have withdrawn at least the minimum for the year, you can convert your pRRIF to a Locked-In Retirement Account (LIRA). You can then leave the funds "parked" in the LIRA to grow.

## **When can I transfer my locked-in funds into a pRRIF?**

If you are over age 50 and no longer working for an Employer of the Plan, you can transfer your locked-in funds into a pRRIF at any time.

## **What happens to the money in my pRRIF when I die?**

If you have a surviving spouse at the time of your death, the pRRIF automatically rolls over to your spouse. However, your spouse may waive their designated beneficiary status. Your spouse may revoke this waiver at any time.

If you don't have a surviving spouse or if your spouse has signed the waiver, upon your death the balance of the pRRIF is paid as a lump-sum to your estate or named beneficiary(ies).

## **What are some important points to keep in mind about pRRIFs?**

- A pRRIF may not provide lifetime income for you (or your spouse).
- The pRRIF offers flexibility. Other than withdrawing at least the “annual minimum payment” each year, you may choose your payment plan. You can also make lump-sum withdrawals.
- You direct and control the investment of your funds.
- If the investments in your pRRIF do well, your payments may be higher or last longer than anticipated. However, the opposite holds true if your investments do poorly.

- ❑ Once you pass away, the funds remaining in your pRRIF would roll over to your spouse, or be paid as a taxable lump-sum to your estate or named beneficiary(ies).
- ❑ At any time you can convert some or all of the funds in your pRRIF to a Life Annuity.
- ❑ If your retirement plan requires that your pRRIF provide for a certain level of income for a certain length of time or last for your lifetime (and your spouse's), **you must monitor the performance of your investments and control your withdrawals.**

*Please refer to the illustrations for additional information on pRRIFs and how they compare to CSS monthly pensions and each other.*

### **What is a Registered Retirement Income Fund?**

A Registered Retirement Income Fund (RRIF) is very similar to a pRRIF, except it's for your non-locked-in funds. RRIFs are also available from financial institutions.

If you have any Registered Retirement Savings Plans (RRSP), you may also transfer these funds into a RRIF. Withdrawals from a RRIF are taxable as income<sup>8</sup>.

### **Is there a minimum annual withdrawal for the RRIF?**

The *Income Tax Act* sets the minimum annual withdrawal for the RRIF (see chart below). You don't have to withdraw money in the calendar year in

---

<sup>8</sup> Starting at age 65, RRIF withdrawals qualify for the pension income amount when calculating your non-refundable tax credits, and the pension income splitting provision.

which you open the RRIF, but after that you must withdraw at least the minimum, which can be based on your age or your spouse's age.

<b>RRIF Minimum Annual Withdrawal Percentages</b>							
(No withdrawal is required in the year you set up a RRIF)							
(The minimum for age 94 is 18.79% & 20% each year thereafter)							
Age	%	Age	%	Age	%	Age	%
50	2.50	61	3.45	72	5.40	83	7.71
51	2.56	62	3.57	73	5.53	84	8.08
52	2.63	63	3.70	74	5.67	85	8.51
53	2.70	64	3.85	75	5.82	86	8.99
54	2.78	65	4.00	76	5.98	87	9.55
55	2.86	66	4.17	77	6.17	88	10.21
56	2.94	67	4.35	78	6.36	89	10.99
57	3.03	68	4.55	79	6.58	90	11.92
58	3.13	69	4.76	80	6.82	91	13.06
59	3.23	70	5.00	81	7.08	92	14.49
60	3.33	71	5.28	82	7.38	93	16.34

Note: The minimum annual withdrawal formula for the RRIF is also used to calculate the minimum annual withdrawal for a pRRIF, and VB payments after age 71.

**How much income will I receive from my RRIF each year?**

As long as you take out at least the minimum each year, you can set up your RRIF to pay you whatever amount you want.

The payment options are the same as for the pRRIF.

**Can I make lump-sum withdrawals from a RRIF?**

Yes. Please see comments under pRRIFs.

**Can the payments from a RRIF be stopped?**

Yes, until you are age 71 and after you have withdrawn at least the required minimum for the year, you can convert your RRIF to an RRSP.

### **What happens to the money in my RRIF when I die?**

If you have a surviving spouse at the time of your death, and if they are named as the beneficiary of your RRIF, the RRIF rolls over to your spouse. If you do not name your spouse as beneficiary (or if your spouse has pre-deceased you) the RRIF is paid as a taxable lump-sum to your estate or named beneficiary(ies).

### **What are some important points to keep in mind about RRIFs?**

Please see comments under pRRIFs.

#### **Administrative details**

*pRRIFs are currently only available to Saskatchewan members of the CSS Pension Plan.*

*pRRIFs and RRIFs are available from authorized financial institutions such as credit unions, trust companies, banks, mutual fund companies, etc. pRRIFs and RRIFs are not available from the CSS Pension Plan. Therefore, if you use any of your funds for a pRRIF or a RRIF, these funds would be transferred to the issuing financial institution.*

## **3. Choosing**

The choices you make will depend on your objectives, your personal situation and the economic environment.

The decision on how to use the funds in your CSS pension account is a far-reaching one, which concerns others besides yourself. Below you will find some basic factors to consider. Not all of them may apply to your situation.

**What is your objective for the pension funds?** If having a stable income for the rest of your life is important to you, then a pension from the CSS Pension Plan would be an appropriate choice. Also, if you don't want the worry of managing your pension funds, a pension from the CSS Pension Plan would free you from that responsibility.

If leaving your unused pension funds to your heirs is very important to you, then VB payments, or a pRRIF may be the best option for you. However, you must be willing to manage your pension funds and accept fluctuations in your income.

If you would like a stable income and also like to leave some money to your heirs, then a combination of a CSS pension along with VB payments or a pRRIF may be the way to go.

**What is your tolerance for risk?**

With a monthly pension from the CSS Pension Plan, you receive the same amount of monthly income for the rest of your life regardless of what happens to investment rates.

If you choose a CSS pension, be aware that the long-term interest rate environment on your starting date has a direct effect on the amount of your monthly payment.

Once you start your CSS pension, your payment will not increase if long-term interest rates increase in the future. Neither will your payment decrease if long-term interest rates decrease.

A pRRIF can also provide a relatively stable income if the investment is a guaranteed fixed rate type of investment, such as a 5-year GIC/Term Deposit. Under this type of investment, your interest rate (i.e., investment return) is guaranteed for five years, so your income will be relatively stable for this period of time.

However, when this investment matures in five years, you have to re-invest the money at the interest rates in effect at that time. Also, because GICs are low-risk, they do not pay a very high interest rate.

**With VB payments or a pRRIF you bear the investment risk.** If the investments do poorly, your income will fall or the payments may not last as long as anticipated. However, on the other side of the coin, you will benefit from good investment returns.

Taking on investment risk could allow you to protect some or all of the purchasing power of your retirement income. History suggests that, over the long-term, investing in equities (i.e., stocks) can be a good strategy to hedge against inflation. VB payments and pRRIFs will allow you to invest in equities. Inflation will gradually erode the purchasing power of a CSS pension.

With VB payments or a pRRIF there is the risk you (and your spouse) may outlive your pension funds.

Because you don't know how long you will live, making sure the pension funds last for your life (and your spouse's) will require lots of self-discipline, careful planning and monitoring.

Current statistics say that approximately one out of every four Canadians will live to age 90.

**If you think that long-term interest rates are low now and predict they will increase in the future<sup>9</sup>,** you may not want to set up a CSS pension or an annuity now. However, you may need to convert your pension funds to a retirement income. VB payments or a pRRIF would allow you to delay converting your pension funds to a CSS pension or a Life Annuity while still receiving a retirement income.

**What if you are not fully or permanently retiring?**

If you will have employment income and a pension, you may be concerned that you may have more income than you need. With VB payments or a pRRIF, you can adjust your income, as long as you take at least the required minimum amount. As mentioned earlier, you may also stop VB payments or a pRRIF altogether if you are less than 71.

---

<sup>9</sup> Generally, if inflation is stable there will be little or no change in interest rates. However, if inflation increases substantially interest rates will usually increase too (the opposite is usually true if inflation decreases).

## 4. Forms

### **To start a CSS pension:**

About three months before you want your pension to start, you should contact the CSS Pension Plan for a set of Pension Projections and the necessary forms for completion and return.

### **To start VB payments:**

About three months before you want to start VB payments, you should contact the CSS Pension Plan for the necessary forms for completion and return.

### **To transfer funds to a Life Annuity, pRRIF, RRSP or RRIF:**

Please contact the CSS Pension Plan for the necessary forms for completion and return.

*If you will be transferring funds out of the CSS Pension Plan, please note the following:*

*Upon receipt of all properly completed documents, the CSS Pension Plan will send your pension funds (by regular mail) to the financial institution issuing your Life Annuity, pRRIF, RRSP or RRIF. If you and/or the financial institution want to have your pension funds sent by courier, at your/their expense, prior arrangements must be made with the Pension Plan.*

## 5. Illustrations

The Charts below are designed to illustrate some of your options. Your actual CSS pension payments, VB payments, and/or pRRIF payments will vary from the amounts indicated here. Your retirement income will depend on the amount of your pension funds, your personal situation, and the rates of return.

### Chart 1: Examples of CSS Monthly Pensions

The chart below is based on \$100,000 of pension funds, and a pension conversion/annuity rate (long-term interest rate factor) of 2.5%. (The CSS Pension Plan's 4-year average pension conversion rate at December 2020 was 2.5%).

Amount of Monthly Pension Starting at Various Ages (\$100,000 of Pension Funds)*			
Pension Type	Age 55	Age 60	Age 65
Single Life, 10 Year Guarantee	\$393.34	\$434.60	\$488.22
Single Life, 15 Year Guarantee	\$389.97	\$427.56	\$474.23
Joint & Last Survivor, 75% Spousal Benefit, 10 Yr Guarantee	\$363.35	\$396.70	\$441.26
Joint & Last Survivor, 75% Spousal Benefit, 15 Yr Guarantee	\$362.51	\$394.83	\$437.23
Joint & Last Survivor, 100% Spousal Benefit, 10 Yr Guarantee	\$354.34	\$385.49	\$427.55
Joint & Last Survivor, 100% Spousal Benefit, 15 Yr Guarantee	\$354.20	\$385.00	\$426.06

\*This chart is for illustrative purposes only. Your actual monthly pension starting at age 55, 60 or 65 will be different than the amounts shown in the chart. The Joint & Last Survivor amounts assume that the pensioner and spouse are the same age.

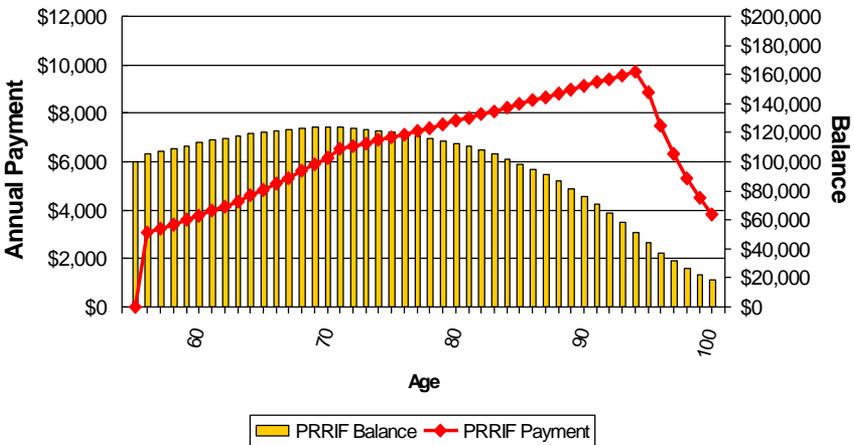

**Observations:**

- ❑ A Single Life Pension pays a higher monthly amount than a Joint & Last Survivor Pension.
- ❑ The longer the guarantee period, the lower the monthly pension.
- ❑ The higher the Spousal Benefit coverage for the spouse, the lower the monthly pension.
- ❑ All other factors being equal, the older you (and your spouse) are when you start your pension, the higher will be your monthly pension.

**Chart 2: pRRIF minimum**

The chart below illustrates the pRRIF minimum

**Minimum Annual Withdrawal**  
(Based on \$100,000 and 5% rate of return)

annual withdrawal and also the balance in the pRRIF at the start of each year. It is based on a deposit of \$100,000 at Age 55 and a rate of return of 5%, (for December 2020 the 5-year GIC rate is about 1.75%). This illustration assumes that the 5% rate of return continues for the duration.

### **Observations:**

- No payment is required in the first year.
- For many years, the minimum annual withdrawal increases each year as the pRRIF owner gets older, then it eventually starts to decrease slightly until age 95 when it starts to drastically decrease.
- The balance in the pRRIF actually increases for a number of years, provided that only the minimum annual amount is withdrawn.
- The pRRIF continues for the lifetime of the owner, even if the owner lives beyond Age 100.

### **Chart 3: VB Minimum-Specified-Maximum**

The charts on the next page illustrates the monthly VB minimum, suggested maximum for SK members, a specified payment of \$500.00 monthly, as well as the estimated funds remaining in the VB account for each payment illustration. It is based on an account balance of \$100,000 at Age 60 and a rate of return of 5% (for December 2020 the 5-year GIC rate is about 1.75%). This illustration assumes that the 5% rate of return continues for the duration.

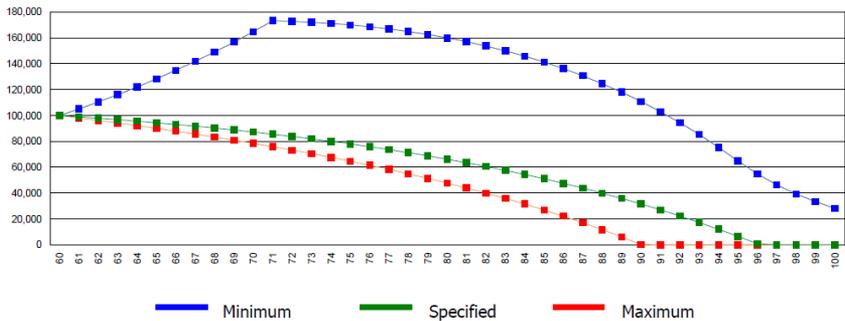

Note that the VB minimum does not start until age 71. This is different than the pRRIF minimum which starts the second year (see Chart 2 on previous page).

## Estimated Monthly VB Payments Starting January 2018 <sup>1</sup>

Age	Date	Minimum		Specified		Suggested Maximum <sup>2</sup>	
		Payment	Balance	Payment	Balance	Payment	Balance
60	January 2018	\$0	\$100,000	\$500	\$100,000	\$570	\$100,000
61	January 2019	\$0	\$105,117	\$500	\$98,988	\$567	\$98,130
65	January 2023	\$0	\$128,356	\$500	\$94,411	\$553	\$90,071
70	January 2028	\$0	\$164,753	\$500	\$87,238	\$537	\$78,469
71*	January 2029	\$763	\$173,207	\$500	\$85,586	\$534	\$75,913
75	January 2033	\$825	\$169,963	\$500	\$78,044	\$523	\$64,649
80	January 2038	\$910	\$160,020	\$500	\$66,228	\$510	\$47,822
85	January 2043	\$1,003	\$141,295	\$500	\$51,062	\$503	\$26,979
90	January 2048	\$1,101	\$110,795	\$500	\$31,598	\$0	\$195
95	January 2053	\$1,081	\$64,848	\$500	\$6,616	\$0	\$0
100	January 2058	\$471	\$28,237	\$0	\$0	\$0	\$0

\* First year in which the minimum payment must be taken

## Estimated Funds Remaining by Age

## Observations:

- No payment is required until after turning age 71.
- For many years, the minimum annual withdrawal increases each year as the member gets older, then it eventually starts to decrease slightly until age 95 when it starts to drastically decrease.
- The balance in the VB account actually increases for a number of years, provided that only the minimum annual amount is withdrawn.

- If the suggested maximum monthly payment is taken each year, the funds are exhausted at age 90.
- As shown in the Specified column, if you want the funds to last beyond age 90, you must withdraw less than the suggested maximum each year.

## 6. Definitions

### **Spouse (Saskatchewan)**

“spouse” means: (i) a person who is married to a member or former member; or (ii) if a member or former member is not married, a person with whom the member or former member is cohabiting as spouses at the relevant time and who has been cohabiting continuously with the member or former member as their spouse for at least one year prior to the relevant time.

### **Locked-in Retirement Account (LIRA)**

It is sometimes referred to as a "locked-in" RRSP, which is a "special" RRSP for locked-in pension funds.

### **Mutual Fund**

Is a pool of money from a large number of individuals, to be invested on their behalf by professional money managers, into specific types of investments, such as common shares (i.e., equities), mortgages, bonds or money market instruments, or invest in a combination of investments such as common shares and bonds (balanced mutual funds).

If you have any questions or want more information about your options, please do not hesitate to contact the Pension Plan's office. Or, you can set up a personal visit to discuss your options (please call in advance to arrange an appointment).

*The information in this booklet is designed to give members a better understanding of the retirement income options for their funds in the CSS Pension Plan. This booklet is not intended to replace the official Bylaws, Rules & Regulations of the CSS Pension Plan, nor provincial and federal legislation governing funds in registered pension plans. The CSS Pension Plan does not intend the information in the booklet to be relied upon as professional advice, and expressly disclaim any liability for its contents. You may wish to consult professional advisors to help determine the consequences of the retirement income options available for your pension funds (some of which are not reversible).*
